MOOC

-Youtube api

-Certification (préparation+passage)

Adding new quizz type: now we have 2 quizz types:

1-Simple quizz (or courses quizz) : already done within precedent milestone.

2-Certification quizz : (or thematic quizz)

This quizz is different from simple quizz on 2 points:

a) The quizz contains questions from all courses of a specific thematic

b) A student can't pass this kind of exam only if he had already passed X number of simples quizzes with a minimal % of good answers, those 2 params are specified by the teacher on the certification exam configuration board.

-Student can also tag his preferred thematics in order to receive notifications if its contents is updated.

Courses management core module

-Admin view:

Manage teachers accounts and students accounts.

-Teacher view:

Define new course :

- Incude the course in a thematic or sub subthematic

-Add metadata keywords(for search)

- He can also add a new tematicor subthematic

Define course structure:

-Table of content and chapters

-In a chapters:

-Adding content:

- In this level we want to add just Simple content (simple text an hyperlinks)

-Student View:

Students can view all of topics and of course consult a specific courses

2)Evaluation and certification module :

Teacher view:

Teacher can add new quizzes (Questions and possibles answers) and link quizzes to thematic
